

AWS Ports:

- **443:** HTTPS – For secure communication with AWS APIs, S3, CloudFront, and other services.
- **80:** HTTP – For insecure communication with AWS services.
- **22:** SSH – For EC2 instance management (Linux instances).
- **3389:** RDP – For Windows instances management.
- **5439:** Amazon Redshift – Data warehouse access.
- **3306:** Amazon RDS – MySQL and MariaDB access.
- **5432:** Amazon RDS – PostgreSQL access.
- **1433:** Amazon RDS – Microsoft SQL Server access.
- **1521:** Amazon RDS – Oracle DB access.
- **6379:** Amazon ElastiCache – Redis access (non-SSL).
- **6380:** Amazon ElastiCache – Redis access (SSL).
- **27017:** Amazon DocumentDB – MongoDB API access.
- **2049:** Amazon EFS – NFS file system access.
- **111:** Amazon EFS – NFS-related services.
- **25:** Amazon SES – SMTP for email sending.
- **465/587:** Amazon SES – Secure SMTP for email sending.
- **1883/8883:** AWS IoT – MQTT protocol for IoT devices (unencrypted/encrypted).
- **3000-4000:** Amazon AppStream 2.0 – Application streaming.
- **8143:** AWS Directory Service – LDAPS (secure LDAP).

DevOps Tools Ports:

- **Jenkins:**
 - **8080:** Jenkins web interface.
 - **50000:** Jenkins agent communication (master-slave communication).
- **Docker:**
 - **2375:** Docker daemon (insecure, plain text communication).
 - **2376:** Docker daemon (secure communication via TLS).
 - **5000:** Docker Registry (for storing Docker images).
- **Kubernetes:**
 - **6443:** Kubernetes API server (cluster management).
 - **2379/2380:** etcd (Kubernetes cluster database).
 - **10250:** Kubelet API (node communication).
 - **10255:** Read-only Kubelet API.
 - **10256:** Kube-proxy metrics.
- **Prometheus:**
 - **9090:** Prometheus web interface and API (monitoring).
- **Grafana:**
 - **3000:** Grafana web interface (visualizations).
- **SonarQube:**
 - **9000:** SonarQube web interface (code quality).

- **9092**: SonarQube Compute Engine for Elasticsearch.
- **Ansible Tower**:
 - **8080**: Ansible Tower web interface (orchestration).
- **Consul**:
 - **8500**: Consul HTTP API and web UI (service discovery).
 - **8600**: Consul DNS interface for service discovery.
- **HashiCorp Vault**:
 - **8200**: Vault HTTP API (secret management).
- **ELK Stack**:
 - **9200/9300**: Elasticsearch API and transport layer.
 - **5601**: Kibana web interface (log visualization).
 - **5044**: Logstash input (data ingestion).
- **Terraform Enterprise**:
 - **8800**: Terraform Enterprise web interface.
